Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to a process of making a mat.

Group II, claim(s) 15-16, drawn to an apparatus for making a mat.

Group III, claim(s) 17-21, drawn to a fiber mat.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Taking each independent claim as a whole, the common technical feature (i.e. a fiber web layer is opened before being superposed with another fiber web layer) is either anticipated by or obvious over anyone of Neveu et al (US 5,253,397; figure 5) and Pike et al (US 6,352,948; figure 8). Both of these patents teaches hydroentangling (i.e. opening) a first web, and then superposing a second web onto the hydroentangled (i.e. opened) first web. Accordingly, the special technical feature linking these three groups of claims does not provide a contribution over the prior art. Therefore a holding that these groups do not relate to a single inventive concept is proper.

3. A telephone call was made to Mr. Surinder Sachar on 09-03-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
